

PRACKFOL
SINCE 1429

Prackfol wurde 1429 das erste Mal urkundlich erwähnt, bereits seit dem 17. Jahrhundert wird hier Weinbau betrieben und das ist kein Zufall. Unser Weingut befindet sich in Völs am Schlern, einer Berggemeinde im Herzen der Dolomiten, an der sonnenexponierten Seite des Tierser Tales. Unsere Lagen starten auf 550m und steigen bis auf 950 m.ü.d.M. Die imposanten Berggipfel lassen die besonderen klimatischen Bedingungen in dieser Lage erahnen: Auf kühle Nächte folgen oft sehr warme Tage. Diese markanten Temperaturunterschiede bieten in Symbiose mit dem Moränenboden über dem vulkanischen Bozner Quarzporphyr-Sockel hervorragende Voraussetzungen für hochqualitativen Weinbau.

Prackfol è stato menzionato per la prima volta in un documento del 1429, la viticoltura è praticata qui dal 17° secolo. e non è una coincidenza. La nostra cantina si trova a Fiè allo Sciliar, un paesnel cuore delle Dolomiti, sul versante soleggiato della Valle di Tires. I nostri vigneti partono da 550 metri e salgono fino a 950 metri sul livello del mare. Le imponenti cime danno un'idea delle condizioni climatiche di questa località: Le notti fresche sono spesso seguite da giornate molto calde. Queste forti escursioni termiche, in simbiosi con il terreno morenico che sovrasta la roccia vulcanica.vulcanico di Bolzano, offrono condizioni eccellenti per una viticoltura di alta qualità. condizioni eccellenti per una viticoltura di alta qualità.

Prackfol was first mentioned in a document in 1429, Wine has been grown here since the 17th century and this is no coincidence. Our winery is located in Fiè allo Sciliar, a mountain village in the heart of the Dolomites, on the sunny side of the Tires Valley. Our vineyards start at 550m and climb up to 950 meters above sea level. The imposing mountains give an idea of the climatic conditions in this location: Cool nights are often followed by very warm days. These striking temperature differences, in symbiosis with the moraine soil above the volcanicthe volcanic quartz porphyry base of Bolzano offer excellent conditions for high-quality viticulture.
